Dr. Aven: Your Fills are the paragon of all that is great in medicine. They have cured my little daughter of ulcerous sores upon her hands and feet that had proved incurable for years. Her mother has been long grievously afflicted with blotches and jimples on her skin and in her hir. After our child was cured, she also tried your Fills, and they have cured her.

As a Family Physic.

From Dr. E. W. Carteright, Yea Orleans.
Your Fills are the prince of purges: Their excellent qualities surpass any cathartic we possess, They are mild, but very certain and effectual in their action on the bowels, which makes them invaluable to us in the daily treatment of disease.

From Dr. J. G. Green, of Chicago.
Your Pills have had a long trial in my practice, and I hold them in esteem as one of the best aperients I have ever found. Their alterative effect upon the liver makes them an exceller remedy, when given in small doses for bilious dysentery and diarrheat. Their sugar-coating makes them very acceptable and convenient for the use of women and children.

The daily and weekly issues will be furnished at the lowest cash rates and no exception will in future be made to this rule. The subject of a mail subsidy does not seem to have arrested public attention to an extent commensurate

with its importance. Impressed with this idea, we proceed to recapitulate much that we have already advanced under that head, and also, to add such further points in its favor, as we may think apposite. We have hitherto supported the claims of the G. S. Wright, for such a subsidy, simply because, in such an arrangement we saw a great public advantage; and we are still under the impression that, that vessel is the only one likely to perform the service required, when the means at our disposal are considered. It is true that her accommodation for passengers is not so great as could be desired; but this is a secondary consideration since it is quite clear she would not be left on the route withou competitors. Thus we should secure all the advantages of opposition, which implies low rates of freight and passage. The necessity for competition between this port and San Francisco, has been but two palpably made apparent to us; the careleseness and irregularity which have recently marked the transmission of our mails, the uncertainty attending the delivery of goods, and the high rates for freight and passage have inflected serious injury on our progress; showing very plainly, how little our interests are considered in the hands of a company possessing a monopoly of the trade. California at this moment is wholly incapable of absorbing the present large influx of population arriving by every steamer from the East. Super abundant labor eagerly seeks out the places where remuneration and land offer the best prospects of future success. The most prejudiced cannot deny that in British Columbia, these desiderata are more promising than anywhere else on the Pacific Coast. All that is necessary in order to make this Colony the point of attraction; are cheap and easy means of reaching it, and these will only be created by an opposition line from San Francisco to this port. From a commercial point of view, the evil effects of irregular communication with the outer world, are absolute paralyses to business. The loss arising from the detention of correspondence and consequent disorgan isation of exchange transactions is something large. We need not allude to the many vexatious annoyances in private life, that proceed from the same cause. We have then, the power within our grasp to free ourselves from all these evils, and we can show that from a financial point of view, the adoption of the course suggested, would be most beneficial. Secting 'aside the "immediate results from lower freights and larger importations, a greater immigration would draw capital along with it and set free the funds now lying idle in our Banks. The revenue would be largely increased, reimbursing the Government a hundredfold for any immediate outlay. Without any desire to repeat old grievances, we would remind our readers, that a large sum was expended in a bootless attempt to direct commerce from its natural working at present; they started a fine shart centre, in prolonging the vo, ages last fall and built a cabin which the Back of steamers arriving at this port, by sending them to New Westmineter. The addition of a like sum to that now paid for, the present ill-ordered service would meet all the necessary outlay at this juncture. Our natural advantages of contrality as inferred in the subjoined extract, unmistakeably shows the urgency of promptitude in the case, so that we may firmly hold unquestioned our great superiority over all the neighboring localities. The immediate result will be the rapid. increase of our commercial importance. The vexed question of the Seat of Government is now finally set at rest, and with that, we trust, all our sectional squabbles. By securing cheap and regular communication with the Bay City, we shall widen the channel through which must flow the capital, and population, we stand so much in need of. The fola lowing, taken from the San Francisco

"The Port Townsend Message complains of the irregularity with which the mails from San Francisco are distributed upon the Sound, and says there is no hope of any re-form until the American towns upon Paget Sound have dire toommunication with this city. The Message says:

city. The Message says:
There is no use in disguising the facts that the great milling interests of Proget Sound represent an amount of capital and a body of men whose rights should be as well cared for by our Government as the foreign

city of Victoria, which is at the present time fostered, encouraged and built up by the American Government, by means of its mail steamers, and its naval and military commanders. The troops at San Juan draw their supplies from Victoria, which is viruually their headquarters. Our naval vessels go to Victoria for coal and for the benefit of the telegraph. The steamers from the Columbia river and San Francisco all go to Victoria, and now we see the anomaly of our Government granting a subsidy to a line of steamers to carry the Sitka mail viz Victoria. Why is Puget Sound ignored, and why is it that we are building up a foreign city, to the detriment of our city?

It would not add much, if anything, to the length of their trips, if the Sitka steamers were compelled to stop upou the American side in preference to going to Victoria, and the military and naval supply station should certainly be there. It is not our policy to the ply victoria at all until Victoria becomes an American town, while it is our policy to the contract of the creek. The subject to stantage the contract of the creek is not supply station should certainly be there. It is not our policy to the ply victoria at all until Victoria becomes an American town, while it is our policy to the results and devalors of the creek. The subject to subject to the creek the Reed, which will commence to prospect the Reed, which will commind the mouth of Grouse creek are about five French companies, ground sluicing, and getting good prouded and for the benefit of Grouse creek are about five French companies, ground sluicing, and getting good prouded and for the benefit prospect to surging and get

help Victoria at all until Victoria becomes an American town, while it is our policy to try to settle and develop our own territory upon the Sound. As the demand for lumber increases, the northern part of Washington Territory becomes more and more important. In a few years it will be the great ship yard of the Pacific, and communication with San Francisco would greatly sid this desirable result. The California and Oregon delegations in Coursess should take the desirable result. The California and Oregon delegations in Congress should take the matter in hand

GOOD PROSPECTS.-In speaking of the condition of Cariboo and the present confi dence of the public, the Sentinel says :-"Perhaps at no time in the history of Cariboo has there been so satisfactory a feeling in regard to the mining prospects as is feit at the present moment. From the outlying creeks and gulches in every quarter comes daily the gratifying intelligence of good prospects, and good indications of a profita-Die mining season. Ou and acadicued nanented with success new ground is being discovered, which with the increased experience in mining makes the results of this year's operations seem already a success beyond any former year. In another column will be found the firet general summary for the season. Mr T Ladner got the first pack train of the season to Barkerville on the 3rd inst., being nearly a month earlier than the arrivals of previous

THEATRE ROYAL .- The enter ainment of Saturday night, so far as the main object goes, was successful. As to the expression of personal feeling towards Mr Clarke the public did their duty considering the short notice, and Mr Clarke has every reason to be satisfied, Of course the performance was a secondary consideration, and the good humor prevailing throughout testified how little our people thought of anything but that of saying good-bye to "that fellow Clarke," as Lord Dundreary called him. However, Clarke's Dandreary was good; his valedictory feeling, truthful and sensible, was well received and gave every satisfaction. S me of Mrs Stone's acting was quite up to her reputation, and Mr Callingham's new song was deservedly encored. There is no doubt we understand, about the troupe leaving on Monday, and so we say good-bye and sincerely wish them success.

PROJECTED NEW TOWN ON PUGET SOUND We learn that a site has been selected on Puget Sound for the terminus of the Oregon Central Railroad, the ground for which has just been broken at Portland. The parties interested in the selection are large capitalists who are also concerned in the construc tion of the railroad. They propose to furnish wharf accommodations for sea-going ships, which, landing their cargoes from abroad, will take in return cargoes of lumber or produce. In view of the very difficult and dangerous navigation of Columbia river, it is believed by the projectors that the bulk of the goods destined for Oregon will be landed at the new townsite, whence it may be transported to its place of destination in a few hours. The scheme seems feasible.

Sr. George Hotel - This handsome and comfortable hotel has recently been under. @2 50 for small lots from store. going a thorough renovation for the reception of guests and will be re-opened on the Queen's Birthday, Mr Jacobs, recently from San Francisco, is sparing no expense or pains to make the house worthy of patronage. The walls, floors, furniture, gas and cooking ar rangements have all been renovated and refitted Families can be supplied with suites of rooms. Such a house as the St. we trust the enterprising proprietor may be well patronized.

NORTHERN PACIFIC RAILROAD .- Information has been received in Portland that Edwin F. Johnson, Chief Engineer of the North Pacific Railroad, and James Filton Chief Engineer of the Pacific Division of the North Pacific Railro d, left New York about the middle of April, to make a hurried preli minary and exploratory trip across the con tinent, in the interests of the above road.

To-MORROW Mr McCrea will sell at 1 o'clock in the morning all the balance of stock of dry goods etc etc., of Messrs Mo-Cutchan & Callingham. The sale will be held on the premises of the firm, corner of Fort and Bread street. The stock offered is said to be of superior quality, selected expressly for this market, and will be sold without reserve

FROM NEW YORK .- A private letter to gentleman states that Mr Mercer, of "Female Immigration' notoriety, has a vessel laid on for Portland direct. She is an A 1 brig, called Sally Brown. The writer says that he intends shipping 100 tons of freight by her. The size of the vessel is not stated; she is designed for the coast trade, supposed .-Oregon Herald.

THE Cariboo Sentinel .- We have received the first copy of this journal, issued for the and Logan on Friday, and Washburne season. It contains a cheering amount of and Donnelly on Saturday. Without mining news and seems to be well patronised-It is published by Mr Robert Holloway fately of this city, assisted in the general

management by Mr H E Seelye, also of Vic-Tower IN .- The str. Sir James Douglas towed in the bark Enterprise to Janios Rhodes & Co's wharf on Saturday evening.

She drew fifteen feet of water.

Brodrick's wharf last evening about 5 o'clock, years ago She left Portland on the 15th and Astoria on the 16th inst. On her way up the experienced a southeast blow with weather very thick and wet. Her cargo only consists of some 10 tons of grain and flour. The list of passengers, 14 in number, and consignees will be found in their proper column. She also brought the Naval and general English mails. The steamer Ajax leaves Portland to-day for San Francisco.
